

## Orbit and GxP AnalytiX to deliver end-to-end signal management

**PHILADELPHIA, PA – Orbit and GxPAnalytiX announced plans today to enter a partnership to deliver their Signal Detection, Signal Management, and Reconciliation tools as an end-to-end solution.**

The new partners express confidence that bringing together iSPARC's analytics with Orbit's compliance platform will prove that the sum is greater than the parts, adding that the partners believe their new offerings will create synergistic effects, empowering organizations in ways only possible when analytics and business processes come together. "This partnership is about generating insights from data and making analytics actionable. Working with GxPAnalytiX is going to change the way our clients perform end-to-end Signal Management and will make a meaningful impact in patient safety," says Dan Feith, President at Orbit, "In other areas too. By simplifying routine Pharmacovigilance activities of medicinal products through management and evaluation of emerging safety information, this partnership packs a powerful punch when it comes to audit-readiness and visibility."

"This has been a long time in the making, and we are ready to show our colleagues what we have been working on—with [Orbit's] expertise in software development and our extended pharma industry experience and iSPARC analytics, we think our future clients have a lot to look forward to," said GxPAnalytiX's partners. GxPAnalytiX partners also added, "We provide iSPARC Reconcile as a front end analytics tool to enable interactive review of reconciliation cases related to business partners data exchange agreements, regulatory agencies, clinical SAEs, or product complaints. We see iSPARC playing a critical role in providing business users with interactive analytics integrated directly with their safety database and other related source data, while seamlessly interface with Orbit's user friendly reconciliation trackers."

### ABOUT ORBIT

Orbit is a Division of Feith Systems and Software, Inc. Founded in 1979, they develop solutions for a broad array of pharmaceutical companies, federal agencies, and related industries, with a cutting-edge platform for streamlined, comprehensive solutions. Feith's platform is the foundation for the Orbit Compliance Center, adding workflow automation, analytics, and secure web technology to all products.
