

Bring your PV agreements to life.

Centralized and structured storage of PVAs and their timelines, obligations, and roles simplifies finding and interpreting PVAs to meet regulatory requirements.

Centralized PVA & SDEA Management

Pharmaceutical companies have large volumes of PV Agreements with varying terms and little structure to manage them: this all adds up to a lot of passive and manual work. Orbit drives activities through structured and automated workflows, helping teams clarify expectations and ultimately foster harmonious and inspection-ready business relationships.

Manage Life-cycle

Support contract authoring, manage PV Agreement templates, reviews, approvals, versioning and retirement.

Exchange Documents

Exchange safety documents with partners in a shared platform and report on partner compliance.

Monitor Timelines

Oversee compliance with terms and timelines, track quality and view metrics across global PVAs.

Oversee Delegated PV

Capture delegated activities in a structured database for instant access into status and terms.

Cross-functional power for PVA & SDEA

The industry is moving to a decentralized model for managing post-marketing safety obligations across processes, including Adverse Event Reporting, Aggregate Safety Reporting, Risk Management, Signaling and more. This makes a cross-functional tool to monitor compliance more important than ever.

Big picture partnership oversight

01

Leverage global insights

Identify non-compliant partners and high-risk processes before inspections occur.

02

Share cross-functional work

Derive PVA compliance from Orbit's cross-functional trackers to create a complete picture of partnerships.

03

Simplify complex processes

Reduce manual work around PVA management with automated workflows, reminders, and oversight.

Orbit is a true cross-functional platform where safety teams can monitor partners across ICSR reporting, Periodics, RMPs, Signaling and more.

About Orbit & Feith

From simple data capture through complex workflows and access rights, Orbit promises to change the way your company approaches workflow management.

For over 40 years, Feith has been committed to providing the most intuitive, versatile, user-friendly next generation solutions to highly regulated industries.
